

# Oprah Funding Strategy & Vision

## Executive Summary: The "Sovereign Node"

**Vision:** Oprah Manyika aims to build a "Sovereign Node" for Neurodiversity bridging the UK and Zimbabwe. This is not just a charity; it is a scalable infrastructure providing educational access and neurodivergent support (ADHD, Autism, Dyslexia) across borders.

**Your Role:** You are the Technical Steward/Architect, building the digital infrastructure to handle institutional funding (e.g., the £350k BSWN bid).

## Funding Landscape Analysis

**User Context:** You have "made FirstGens money" (Secured £46k). This moves you from "Risky Startup" to "Proven Operator."

### Tier 1: High-Fit "Infrastructure" & "Job Creation"

- **Mastercard Foundation "Africa Works":** Funds ecosystems that train youth (30M jobs by 2030). Fits your "Software-Defined Training Provider" model.
- **Innovate UK (GCRF/KTP):** Partnerships between UK (IVF UK) and Developing Country (IVF Zim). Good for "AI-driven neurodiversity support" research.
- **Digital Transformation Center (DTC) Ghana (GIZ):** German-funded. Focuses on local digital skills.
- **BSWN (Black South West Network):** The £350k bid you are targeting. This is the "Base Camp" funding.

### Tier 2: Entrepreneurship & Seed Capital

- **Tony Elumelu Foundation (TEF):** \$5,000 seed capital. Good for operational costs/salary.
- **Ghana Innovation Hub:** Incubation for EdTech.
- **Google for Startups Accelerator Africa:** Equity-free support + Cloud Credits. Leveraging your "Neurodiversity in Africa" data is the hook.

### Tier 3: Strategic/Niche

- **Sovereign Tech Fund:** For "Open Source Infrastructure" critical to public interest.
- **Sovereign Node Strategy:** If you open-source the platform, this is a strong contender.

## Addendum: The FirstGens Precedent

### Evidence of Financial Stewardship:

Before Irene Vera Foundation, the Technical Steward (Andie) served as Board Advisor for **FirstGens UK**.

- **Achievement:** Successfully architected the technical strategy that secured **£46,000** in grant funding.
- **Relevance:** We are replicating this winning formula. We are not guessing; we are proven operators.
